HASSAN JAVED DURRANI

Web Developer & SEO Specialist

Muzaffarabad, Azad Kashmir, Pakistan | +92 312 9858 608 | durrani.hasan@gmail.com

PROFESSIONAL SUMMARY

Senior Web Developer and SEO Specialist with 8+ years of experience building responsive, search-optimised WordPress websites and driving sustainable organic growth. Pairs hands-on front-end engineering (WordPress, Elementor, WooCommerce, HTML5, CSS3) with data-driven SEO across technical audits, on-page optimisation, content strategy, and ethical link-building. Backed by a network engineering foundation, delivers high-performance, penalty-safe solutions that convert organic search into measurable business results.

PROFESSIONAL EXPERIENCE

SEO Consultant
Sep 2025 – Present

WASFA Digital Marketing Agency — Riyadh, Saudi Arabia (Remote)

- Lead SEO strategy across multiple KSA client accounts, delivering technical audits, on-page optimisation, and search-intent-driven content frameworks aligned with Google best practices.
- Build bilingual (English/Arabic) ranking strategies and AI-Overview visibility plans, combining NLP, LSI keyword planning, and topical authority models.
- Translate organic visibility into qualified leads through landing-page optimisation, internal linking, and conversion-focused content.

Web Developer – SEO
May 2023 – Present

ScaleUp — Muzaffarabad, Azad Kashmir (On-site / Full-time)

- Develop and maintain WordPress websites with clean, SEO-friendly architecture, owning builds from concept through deployment and ongoing support.
- Combine front-end development with on-page and technical SEO to improve crawlability, page speed, and organic rankings.
- Produce self-contained, responsive components and service pages with structured meta data and contact-form integration.

Web Developer
Jan 2025 – Present

Spart Care — United Kingdom (Remote)

- Design and maintain WordPress websites for healthcare services with a focus on accessibility, performance, and compliance with UK standards.
- Deliver responsive, conversion-oriented layouts that support patient engagement and trust.

Web Developer
Nov 2024 – Oct 2025

Nextnanotech Consultancy — United States (Remote)

- Built scalable WordPress solutions with WordPress, SEO, and e-commerce optimisation across client platforms.

Web Developer
Dec 2023 – Jun 2025

DevEnvision — Islamabad, Pakistan (Remote)

- Delivered tailored brand websites engineered for speed, SEO, and conversion as business-driving tools.
- Applied e-commerce optimisation and search-visibility best practices to attract and engage qualified visitors.

Web Developer
Jun 2024 – Mar 2025

Wayz Advisory / Wayz Digitally — United Arab Emirates (Remote)

- Led responsive website development with SEO and e-commerce optimisation, improving site performance, user experience, and search visibility.

- Built conversion-focused structures to strengthen brands' overall digital presence.

Frontend Web Developer Mar 2019 – Apr 2023
JVH Consult — Belgium (Remote)

- Created custom WordPress websites designed around client brand, goals, and audience, from responsive layouts to themes, plugins, and ongoing maintenance.
- Delivered professional, high-performing sites that built trust and supported online business growth.

Frontend Web Developer Apr 2020 – Mar 2021
MBK Design — Islamabad, Pakistan (Remote)

- Built responsive websites with WordPress customisation and e-commerce optimisation, focused on clean, user-friendly experiences across devices.

Social Media Business Developer Jul 2025 – Aug 2025
Shah Tech — Lahore, Pakistan (Remote)

- Developed targeted social media messaging and business-development outreach to attract the right clients.

Freelance Graphic Designer Jan 2017 – Mar 2018
Fiverr — Remote

- Created logos, marketing materials, website graphics, and brand visuals for clients across multiple industries, managing concepts and deadlines end to end.

Network Engineer (Internships) Feb 2015 – Dec 2016
Board of IT & CisCom Solutions — Pakistan (On-site)

- Gained hands-on experience in router and switch configuration, network monitoring, troubleshooting, and basic security practices.
- Built a strong foundation in network reliability and technical problem-solving that underpins current performance and infrastructure work.
